

Victor[®]

Lynx

Ultra Speed Spray Cleaning & Polishing

Higher Speed for greater Productivity & Performance

The new Lynx machines operate at 1080 rpm to give excellent productivity and superior finish on the floor.

Integrated Active or Passive dust collection systems

The Lynx machine can be fitted with an exhauster for areas where an active dust collection unit is necessary. However, in situations where sound is an issue the Lynx has the ability to be converted to the silent passive dust collection system.

Available in three sizes

The Lynx is available in 3 sizes. Standard machines are 17" (450 mm) or 20" (500 mm). For specialist contracts the Lynx can be made available in a very sleek 15" machine allowing superb burnishing and cleaning performance in smaller areas.

Easier Storage and Movement

The Lynx features a fold-over handle allowing it to be stored in the smallest of spaces. It also features castor wheels on its rear to allow the machine to be tipped backwards and moved around with ease.

The Lynx offers unbeatable results with the added versatility of the optional solution dispenser and active or passive vacuumation
