

## EXCLUSIVE TECHNOLOGIES (optional cleaning innovations)

All technologies can be installed into equipment and will increase scrub time up to three times using a single tank of water.

### ec-H2O™ Technology

ec-H2O™ technology electrically converts water into a cleaning solution that cleans effectively, saves money, improves safety, and reduces environmental impact compared to daily cleaning floor chemicals and methods.

### Exclusive EC-H2O NANOCLEAN™ Technology

Electrically converted water is created by an on board e-cell that generates millions of microscopic bubbles known as nanobubbles that promote the cleaning efficacy of the solution.

This next generation solution now cleans better and cleans more soils in more applications, thanks to the nano-scale bubbles that are an important part of the cleaning mechanism.

**ES® Extended Scrubbing** productivity enhancement system recycles cleaning chemicals to increase uptime and improve productivity by scrubbing floors using 66% less chemicals than traditional cleaning methods.

### FaST® Foam Scrubbing

Technology uses up to 70% less water and 90% less chemicals to improve floor traction as certified by NFSI, helping reduce the risk of slip and- fall accidents. ec-H2O™ technology electrically converts water into a cleaning solution that cleans effectively, saves money, improves safety, and reduces environmental impact compared to daily cleaning floor chemicals and methods.

### Orbital Scrubbing Technology

Rectangular scrub head reaches into corners and hard to reach areas easily.

Orbital scrub-deck delivers hassle free floor stripping, and deep grout cleaning.
