

Options: Battery Technology

Our batteries provide safe & easy solutions to help you clean your facility.

Lithium-Ion Batteries

- Touch up and multiple cleaning applications per day
- Get 20 times longer battery life than standard batteries in high-frequency, quick-charge applications*

Gel Batteries

- Reduce battery maintenance and eliminate watering
- Clean longer with extended run times

Fast / Opportunity charging

- Clean while other batteries are still recharging
- Increase productivity through enhanced daytime and opportunity cleaning
- Improve safety and sustainability with no spills

AGM Batteries

- Reduce battery maintenance and eliminate watering
- Increase battery life with short cleaning applications
- Enjoy longer run times in fewer charges

Standard Batteries

- Clean longer with extended run times
- Help lower your cost of ownership with an affordable battery option
- Extend battery life with proper maintenance

HydroLink® Battery Watering System (**registered trademark of Trojan Battery Company)

- Decrease maintenance needs and increase battery life
- Quick, easy-to-use design requires little to no training
- Protect operators from the possibility of acid contact and other risks associated with open battery maintenance
